

How to Install 3 party App.

- 1) Material UI - Just open google search for "Material UI"
there you ~~that~~ will find
" \$ npm install @mui/material .
Just copy it & paste it in V.S.
- 2) npm - material-icons → Same just search on google
and copy "npm i material-icons" and
paste it in V.S.
- 3) react-icons to search on google
then search for any icon you want .ie. "search"
it will find all the list just select whichever we want
then .
copy code i.e. `import { FaSearch } from 'react-icons/fa'`
& use this wherever you want.
