How to add Font from Google Font ?

1) On google search for "Google Fonts"

2) Now you can search whichever you want
e.g. Search for "open sens'd
then to select it i.e. "get Font" to click.

3) then select "get embed code"
inside "Web" select "@import" then copy it

`<style>{ "@import url ("https://fonts.googleapis.com/css2" "]< /style.`

4) Paste it in our project folder like App.css
paste here :

5) Then next step copy font-family from google Fonts page
below it & paste it in
body { font-family: "Open Sens, suns-serif" }
so now all will get applicable -
